		<p>We were told that the network was only 2 years old. We always try to use existing equipment if we can. after further evaluation we discovered network to be 6 years or older. our equipment or any other security equipment will not work on this network. it will need updated. We have designed the network needed for job.</p> <p>We were given a count on cameras on each location. our previous quote reflected the camera count given to us by the city. We came out to install and realized that the camera count that we were given is not accurate to what you have installed on all of your properties. There are additional cameras found on site that were not given to us on the initial camera count by the City Rep. We added the additional cameras needed to match what you have installed already on this change order</p>
